Welcome

to our American Science & Surplus catalog. Here you will find a unique mix of industrial, military and educational items, with an emphasis on science and education. We supply a wide range of unusual and hard-to-find items (some say bizarre stuff) to the hobbyist, tinkerer, artist, experimenter, home educator, do-it-yourselfer, and bargain hunter. Our items are great gifts, inexpensive supplies, and an endless reason for a giggle or a "Gee whiz!" We try to be scrupulously honest in presenting whatever we know about what we have, and always take it back, no questions asked, if the customer isn't satisfied with it. Please remember that we offer many more items than will fit on these pages. You can both peruse and purchase every item we have at our website: www.sciplus.com. Thank you for taking the time to browse our catalog. We appreciate your business.

Frequently Asked Questions

What is surplus?

We buy closeouts, inventory overruns, mis-manufactures, and items whose time has not come. We can usually acquire these items on a one-time-only basis. When a surplus item is gone, it is gone. So if you see something you love, best get it now since we may not have it tomorrow. Our website is frequently updated with our inventory. If you see an item in our catalog, but cannot find it online, it means we have sold out of that item. If our stock of the item you have ordered is exhausted we will refund that portion of your remittance. When we can't find surplus, we may carry regular merchandise which we think those interested in learning and tinkering will find appealing, but only if we feel it is good quality at a fair price.

Can I return items?

Yes. We accept all returns without question and will either refund your purchase price or send you a replacement, as you chose. Returns must be made within 30 days of purchase. For complete details, please check the order form bound in the center of this catalog.

What forms of payment do you accept?

We accept Visa, MasterCard, Discover, American Express, checks and money orders. We are sorry to report that we cannot accept CODs, cash, stamps or gold. **If paying by check, please be aware that you are authorizing American Science & Surplus to use the information on your check to make a one-time electronic debit to your checking account.** This electronic debit will be for the amount indicated on your check. If you do not have sufficient funds in your account, a returned check fee may be debited from your account. If you have any questions, or choose not to have your check converted into an electronic item, please contact American Science & Surplus at (888) 724-7587.

Do you have a minimum order requirement?

We regret that the costs of doing business preclude us from processing orders of less than \$10.00 merchandise value (exclusive of shipping and handling). We will return orders of less than \$10.00 merchandise value.

Additional information can be found on the order form bound in the middle of this catalog.

6-String Stand

We've lost a lot of guitar heroes lately. Betts, Beck, Rossington... The list goes on. And so does the music, so take care of your guitar and store it properly on this sturdy metal stand with padded arms and head. It's 14" tall when closed, but 12-1/4" tall when open. The (2) rear legs fold out and have adjustable feet. Front legs have padded fold-down arms 5" long before tilted tip ends. Everything's black, (Mick would approve) and it'll hold other instruments, too—not just guitars. And if you're not into music, it's a great, sturdy easel that'll display artwork, signs, menus, and more.

Attack of the Shrooms!

Quick—everybody take cover! It's the attack of the giant, mushroom-shaped, color-changing landscape lights! Don't kid yourself into thinking you won't have to run very far because their batteries will run out—they're solar-powered! They'll keep recharging as long as you keep running, so you might as well just surrender and enjoy them. Measure 7" dia x 10" tall, and their heads can swivel/tilt as they cycle through (7) colors. They're weather-proof and can last up to 8 hours on a single charge depending upon weather/season. Included mounting ground stakes make sure their big heads don't tip over.

Twist Ties of the Gods

If you had a 10-foot loaf of bread, these would be the only way to close the plastic bag. They're 34" long x 1/2" dia with flexible metal cores covered by a thick layer of foam that grips tightly. Tie up big tools and cables, make ad hoc hooks, tie down outdoor furniture, organize sports equipment, wrap sails and gear of all sorts (we think they'll float), or make emergency repairs. Our each is a 2-pack of basic-Blue or bright green giant ties.

Our Most Tropical Spout

We love a good pink flamingo around here, but this curvy 15" long pink flamingo-shaped watering bottle topper is a step beyond. Fits water and soda bottles by screwing directly onto their tops, where the caps would normally fit. When the flamingo is screwed on tight, tip the bottle and the liquid inside will flow out of the orange and black beak. We know—catch your breath before you call us to order one.

50786 Flamingo Spout \$5.75/each

Disappearing Twine

Calling all gardeners! You can never have enough eco-friendly garden twine, so here's a nice 400-foot roll of it. From RapiClip® this Jute Garden Twine is in a garden-friendly dark green, which means it sort of disappears visually. The best news is, since it's made of jute, one day it actually does disappear.

97681 Jute Garden Twine \$3.25/each

Spot The Flowers

These solar-powered, wireless garden lights are on a stake like most, but these have an adjustable focus from flood to spot, to direct the light where you want it. Measure 4-1/2" dia x 15" tall with the removable stake. The light head itself is 2-3/4" dia x 4-1/2" long in a bullet shape. The cool-white LEDs shine at 100 lumens, and the solar panel on top swivels 360 degrees to catch the sunlight.

97218 Garden Lights \$11.85/each

The Old Quad Beam

How many times have you said, "Y'know, the old Tri-Beam just isn't enough." We haven't said it in a while now that we have this 750-lumen, solar-powered Quad Beam LED Motion Light from iZoom®. Measures approx 3" x 5" x 2-1/4", lasts up to 8 hours on a charge, and has a color temp of 6500K (daylight). Also has a dusk-to-dawn light sensor, and motion-sensing up to 29 feet. Weatherproof (IP65 rated), with a durable plastic body and a built-in rechargeable battery that charges in 6 to 8 hours of full sun.

98019 Solar Motion Light \$14.95/each

Garden Labels

The plants aren't going to name themselves. These Tall "T" Labels from RapiClip® are for your garden, so you don't forget what you planted, or what you named the plants. Labels are white, generally T-shaped and 8" tall with a 2-1/2" x 1-3/4" labeling area that looks like a basketball backboard. You'll get a pack of (10), and when you see how organized your garden is, you'll probably want another (10).

97683 Garden Labels 10 Pk. \$2.95/each

Buddha Does Gardens...

Add a touch of luck to your garden or living space with these See/Speak/Hear No Evil Decorative Buddha Statues. Measuring appx 5-1/2" tall, this solid garden decor is made of cement. Three different Buddhas in the "See, Hear, Speak no evil" positions. **Sold individually** (Our choice) or if you order (3) we will pull one of each. The statues are intricately carved with facial features, textured headpieces, and a flat bottom to sit perfectly straight. These inspirational decor pieces are made with porous cement. Ideal for indoor or outdoor use

52113 Mini Buddha Busts \$5.95/each

Classic-ish Lantern

We got this all-metal, 6-1/2" tall x 4" dia solar-powered decorative lantern from i-Zoom®, one of our most trusted light suppliers. It's classic in that its punched-out decorative sides have a vaguely Art Deco pattern. Don't imagine some ye olde England design—this is closer to the Jazz Age. But it's solar, and it has LED lights, so it's thoroughly modern. Weatherproof, light-activated and runs for up to 8 hours when charged. Hang it from the elegant handle or set in on a table and let it throw its dramatic, stunning shadows. All that for less than 10 bucks. Probably a good idea to get a pair.

97871 Shadow Lantern \$9.50/each

For Water, Not Oil

This very convincingly antique-looking brass-topped glass mister looks sort of like an oil can, except it's made of ridged glass and would not seem out of a place in a black and white movie about a beautiful dame who just wishes she could get on with life already. Has a finger hold and a thumb pump—old school and sophisticated. Best part is, it's from Kikkerland®, which means it's brand new and works great (unlike actual antiques). Use it to create a humid environment like those old movie stars did for supple skin. Also, mist your plants, revive wilted flowers and generally de-dry rooms. Measures 6" tall overall with a 3" tall x 3" dia bottle. Holds 6-1/2 oz, which is 200ml in Canada.

51128 Brass & Glass Mister \$6.85/each

For Your Soul Or Your Yard

If you've built a little birdhouse in your soul, you might be a giant. But we'd like to encourage you to hang a little birdhouse in your back yard. Ours is made of wood and measures 11" tall x 6-3/4" square, red with white trim, a green base and an unpainted roof, which lifts up for easy cleaning. In sort of a farmhouse style. Birds enter through the attic window, and the whole thing hangs from a sturdy, 8" long coated cable. Has a little green bicycle leaned up against the front of the house but most birds, if not all, will choose to fly in and out rather than ride.

50659 Wooden Birdhouse \$24.50/each

Who'll Stop The Rain?

No one can stop the rain, and CCR should have known that. But you can measure it with this Rapitest® Rain Gauge. Has a weatherproof metal stake and protective holder which holds (as holders do) a cylindrical gauge. Max reading is 5" or 130 mm. Stake length is adjustable between 10-1/4" to 30-3/4". You don't need a weatherman to know which way the wind blows, but you do need a rain gauge to know how much rain fell. You're welcome.

97680 Rapitest® Rain Gauge \$14.95/each

What Big Claws You Have

You know when you're trying to pick up dead leaves and stuff like that from a soggy garden? That's when you need these Garden Gloves with Claws. Let the claws do the digging in. Gloves come in assorted colors—green, purple, and black—with black, plastic, 2-3/4" long, talon-like caps on the fingertips but not the thumbs. Nice and creepy for a costume if you don't do yardwork. Gloves measure 10-1/8" from base to the tip of the middle finger (don't read into that), and 2-7/8" at the wrist. Made of tough rubbery material like most garden gloves. The black pair has claws only on the right glove, and the purple has claws only on the left. You'll get what you get without throwing a fit, because one claw glove is better than none.

50546 Gardening Claws \$3.95/each
Buy 2 or More! **\$3.40/each**

Suit Your Soil

Grow a beautiful garden full of plants that love your soil! It's easy if you know your soil's pH, and we have a gauge to help you! Stick the probe into moist soil for the pH to register in a separate 4" x 2" x 1" gauge box on the end of a 26 inch cord. That lets you read the gauge without having to lay on the bug and worm covered ground to see it! A needle indicates the pH on a scale of 3.5-9, and you get a list of which plants like which pH levels.

91586 Soil Ph Gauge \$21.95/each

Where Light Meets Water

The problem with indoor rope lights? They're terrible in the rain! This 16-foot-long, 120VAC Aura LED ColorRope LED Tube Light from AuraLED laughs at the weather. Works great indoors, too, especially when the pipes burst! Made of clear, 1/2" dia industrial-grade PVC tubing with modes that range from single-color to precise holiday themes of red/white/blue, orange/yellow/brown and red/green/white. Remote has (16) color settings. Great for patios, porches, pathways and a plethora of party places.

50888 Outdoor Rope Light \$19.50/each

You Can't Slam This Screen Door

But it will still keep the flying critters out of your kitchen. This hanging screen is made of a plastic fabric mesh and will fit doorways up to 35" x 82", but works best in slightly narrower ones to allow some side overlap. Works great on campers, RVs, trailers and the like where you really need to let air flow or buy four and build a giant insect cage that can cover a small tree. Installs with adhesive hook-and-loop tabs and has a weighted bottom, so it won't flap in the wind. Portable, handy and ready for summer. Just like you.

47901 Portable Screen Door \$7.50/each

Wake Up Safely

Don't trust nature, or the front desk at your hotel, to give you a wake-up call? We understand. That's why we travel with this 4" x 4" x 2" silver plastic alarm clock with glow-in-the-dark hands and numbers. It's very cool, we have to say. Takes (1) "AA" battery to power the quartz movement, but you can track down a battery (oh, look, there's one for sale just a few lines below this one). The clock face light is not very bright (better for sleeping), but the numbers are big (3-3/8" tall), bright (a very pleasant sporty green) and soothingly glowing. Now all you have to do is pack a bag and book a flight (or gas up the car).

50804 Glow Alarm Clock \$4.75/each

Tea Time? Tea Lights!

No one likes drinking tea in the dark, which is why we're offering this (2)-pack of wax-free, battery-operated, cool-to-the-touch decorative LED tea lights, aka votive candles. This way, you'll never have to sip in the dark again. Your Earl Grey thanks you. Lights measure 1-3/4" from their plastic bottoms to their flame tips. On-off switch hidden on the bottom. Button cell batteries included.

50059 LED Tea Lights \$2.80/each

Is The Library Safe?

This isn't a book, but it's definitely book-ish. Looks like a leather-bound volume from the Bodleian but it's just a little wooden box, approx 8-1/2" x 5" x 2" (7" x 3-7/8" x 1-5/8" inside) that's perfect for stashing the jewels, cash, or whatever you need to stash in plain sight on the shelves.

94850 Realistic Book Safe \$14.25/each

Save Electricity And Valuables

You can do both with this non-functioning, fake electrical outlet that's actually a small safe. Looks like an ordinary off-white outlet, but has a 7" x 2" x 2-1/4" cavity in back. Swap out a real outlet, or use the teensy drywall saw that's included and make a new bogus one anywhere you like. This one even takes plugs for further verisimilitude. We suggest putting a burnt-out bulb in the lamp you plug into this outlet to fool the smarter burglars. Always work at least one step ahead.

32791 Outlet Safe \$5.95/each

The Butt Bucket

For when you just can't drag yours around anymore? No, for out-of-sight cigarette butts and ash disposal. This mini-bucket, sans handle, is a 3-1/4" dia x 3-7/8" tall black-composition ashtray that can sit on a desk or table, or fit neatly into a car's cup holder. Its removable lid has (3) slots to hold lit cigarettes and a small, cigarette-diameter hole so the butts slide out of sight and go out for lack of oxygen. Cuts down ambient dead-butt odors, too.

93044 Butt Bucket \$2.65/each

The Sands Of Time...

Gosh, we haven't watched our stories in ages. Anybody know what Luke and Laura are up to? Let us know. Meanwhile, check out these awesome sand timers! We can't really call them hourglass timers because they have (3) teardrop-ish clear glass globes instead of (2), giving them a modern—dare we say, contemporary—look. Top and bottom globes are larger, and the middle one doesn't fill if you're using it right. The units we tested were +/- 6% of the time. You pick: the 15-minute glass, measuring 8" tall x approx 3-1/4" dia with steel-blue sand; the 30-minute, measuring 9" tall x approx 4" dia with red sand; or the 60-minute, measuring 12" tall x approx 4-1/2" dia with goldenrod yellow sand. Ages 14+.

A Time Saver?

You can't cut time in half, but with this ingenious 32" dia clock, you can fold time. It's our favorite foldable (and unfoldable) wall clock from the always-reliable Kikkerland®. In classic white, with a spare, Swiss train station design, the clock is portable for those times when you want to put time on pause. Folds down to 11" dia and pops open to full size instantly. Very lightweight fabric, with quartz movement that requires only (1) "AA" battery, which you supply. Take it wherever you go. Has black markings, a black border and an elegant lack of numbers, because you already know where they are.

You're so smart—yes, it's because they're reusable and won't muck up your walls, laptop or windows! You pick: the set of (8) Rick and Morty decals, approx 2" to 6", with Rick, Morty, Summer, Pickle Rick, Slime Brain and more; or the (15) Star Wars decals, approx 1" to 4", with the Death Star, Millenium Falcon, TIE Fighters, X-Wing Starfighters and more. **WARNING: CHOKING HAZARD—Small Parts. Swingin' Desk Toy

Newtonian demonstrator for science teachers. Mindless play for the rest of us. These are shiny, nicely balanced, high-performance examples of the classic Newton's Cradle - a ball on one end of a row of (5) suspended, barely touching balls swings into the others, and the ball at the opposite end reacts to the collision. The 11/16" dia balls in this smallish version (all-metal frame 6-1/2" high x 4" x 4-1/4") will collide about 30 times. Awesome. Even more awesome that we paid someone to count the bounces just for you!

93847 Newton's Cradle \$13.95/each

Gaze Into Our Crystal Ball

NEW ITEM!

What's that we see? Oh, it's you, picking up the phone and ordering this gorgeous, crystal-clear crystal ball, 80mm dia (that's approx 3-1/2" dia to American fortune tellers), with a squarish acrylic stand, approx 1-1/4" per side. Wait, we're getting something else now...it's your cousin Rhonda and your uncle Harold...they're both ordering one, too, on our website. Great for any room in the house, or the traveling caravan. This isn't a toy for kids—for consenting adults only.

98067 80mm Crystal Ball \$19.85/each

See A Crystal Ball In Your Future?

Well, if you had a crystal ball, you'd be able to see that there's a crystal ball in your future, and you'd know not to pass up this very, very nice glass gazing ball. It's 4-1/4" dia (and heavy) and comes with a footed dark-wood stand that spins smoothly. The stand is just over 3" dia. Together, the ball and stand are 6-1/4" tall. Comes in a presentation and storage box. The perfect accessory for your next fortune-telling gig.

94069 Glass Gazing Ball \$31.50/each

Ginormous Gem

Bigger than a baseball across the top, this is one ginormous jewel. You pick a clear or deep-translucent-blue, 24% lead crystal, cut-glass gem. It's 3-1/8" dia at the top, tapering to point 2-1/8" deep. Could be mounted in a stunning, but really, really, really big engagement ring.

93959 Jumbo Clear Gem \$9.50/each

93960 Jumbo Blue Gem \$9.50/each

Pseudoprecious Gems

Our each is a dozen gorgeous, glimmering glass gems, in a round cut in (12) different colors, including pink, green, blue, red, golden, white, and various shades of each. Think diamond, ruby, sapphire, emerald, amethyst, topaz, whatever. In a dark blue book-like presentation box, the Queen collection features (12) gems at 40mm across (approx 1-1/2" or tad bigger than a silver dollar) by 27mm (approx 1") deep.

Jolly Barry

Why does Roger always get the credit for the skull and crossbones pirate flag? We feel it is time to share and have elected Barry to the post because he just walked by the vast editorial department here at A.S.&S. (AKA "my desk") Our Jolly Barry flag is 3ft x 5 ft., black polyester with a reinforced edge containing grommets for flying. It has the traditional skull and crossbones in white with the added fillip that the skull is wearing an eye patch! Sail Away!!

A Jolly Parrot

We like to call this fella Captain Pirate, since that's what it says on the rum barrel he's got one foot propped up on. But the box calls him Capin' Parrot Pirate. Arrrrghh, we're gonna give that one a wide berth. Stands on a 2-3/4" wide oval base, and about 8" tall to the top of the Jolly Roger flapping behind his head. He's holding a bottle of something, and he looks ready to party. We'd be proud to display him in a basement bar, rec room, lake house, camper or back yard.

NEW ITEM!

This nautical-ish, New England-ish, dish-ish tray resembles a pocket watch, approx 4" dia, but hollowed out (remember, it's a tray?), with black compass symbols on a white background. Has a shiny golden front edge, back and hanging hook on top. Might be brass. Call it a trinket tray that measures approx 3/4" deep. Don't use it for food, but put anything else you like in it. Or hang it on a wall for a touch of old-world charm and mystique. Ahoy, Purse.

A Storm's A Comin'

Admiral Fitzroy used a device like this to determine weather changes aboard the HMS Beagle on Charles Darwin's expedition. This, of course, is why it's known as Fitzroy's Storm Glass. It's believed that the different crystal formations inside the approx 11" tall x 1-1/2" dia glass tube with a 2-1/4" base indicate weather changes. Must be placed on an interior wall not subject to sudden temperature changes, sunlight or air from vents and may need to be tested in multiple locations. Follow the instructions carefully and give it about a week to stabilize. It goes without saying, but this is not a toy. It has flammable liquid inside, so no rough-housing near the Storm Glass!

Suck It Up!

What's the one thing most plastic swivel-head vacuum hose attachments are missing? Headlights—exactly! Ours is called the Power Reach and it has two forward facing LED lights on top, each with an on-off switch. The whole unit measures 12" x 4" and has a pivoting port that will fit a canister vacuum or the hose attachment on other vacuums. Lights attach via magnets, and you'll be glad they're turned on when you're navigating under a bed or behind a cabinet. We believe it's designed for hard surfaces, not carpeting, since the bottom has felt pads and channels for stuff to get sucked into. So, think of it as a lighted, one-step broom—no dustpan needed!

Drinking Bird

You're buying the drinks and this wacky, yet debonair, bird with a top hat and plastic base (7" tall OA) can't get his fill of water. Get him started, and he dips his beak into your glass repeatedly. How? Fluid inside his glass body condenses from the evaporative cooling of the water off the bird's beak, making it top heavy and dunking it back into the water. The condensate rejoins the liquid pool in the bird's bulb, and he tips up again. Process continues indefinitely. **WARNING!** The fluid and dye inside the bird can permanently stain, and the bird's glass body can easily be broken. Original Slinky

Does anyone need to be told what a Slinky® toy is?? Okay, it is a very slack spring, 2-7/8" dia x 2-1/2" long, compressed. It will stretch out to about 5 or 6 feet long without deforming. That's the boring part. The interesting part is that it "follows" itself. Slosh it from hand to hand. Put in on the top step of stairs, flip the end down a step, and watch it walk down stairs, or down an incline (they can do it alone, but we recommend them in pairs). Believe us, no childhood (or adulthood) is complete without an original steel Slinky®.

Little Walter Would Approve

He was born Marion Walter Jacobs, and in his sweet home Chicago he changed the way the harmonica was played. They called him Little Walter, and his blues harps were standard size, but oh, how he would have loved this Little Harmonica from the folks at World's Smallest. Measures 1-3/8" x 1/2" x 3/8" with (4) holes and (8) notes. Made of metal, just like the real thing, and plays in the key of C. Has a small lobster clip on the side so you can attach it to your zipper or keychain and entertain people anywhere you go. If you get lost in the woods, it's way more fun than an emergency whistle. Back of the package names the different parts of a harmonica and tells you which notes blow and which notes suck. Yours will sound beautiful either way, just like Little Walter's. Play The Piston Flute

Or the Swanee whistle. Whatever you call it, this little slide whistle (just consider it the smallest trombone in the universe) has an outsized musical history. No elevator has ever fallen in a cartoon without its accompaniment, and no jug band is complete without one, but Louis Armstrong also played one on his Hot Five recordings, and Ravel even required one in an opera score. In assorted plastic colors with a steel slide, 6-7/8" long x 1/2" dia.

Back To Basics

It could have been called an Alabama Buzzer after Alabama Vest, the man who invented it. Or a Clegghorn, after Thaddeus Von Clegg, the clock master who fabricated the first one. Flower Power

We have a mauve-ish, rose-ish backpack that's so cute (and sturdy and light), we wish we were 8 years old again, or ironic enough to wear it as an adult. Says "eeBoo" (the brand name) on the flap that covers an exterior zipper compartment and the roomy main compartment with a zipper compartment inside and a sewn-in name tag. Even when the flap is down, help by magnet fasteners, it doesn't cover the (52) colorful embroidered flowers on the bottom half of the bag. Has (2) padded, adjustable straps and a canvas hanging/carrying loop. Measures 10" x 16" x 2" but expands when it's stuffed.

51047 Flower Backpack \$9.50/each

Perfect For Necking

Before we got into this business, we never knew about such things as neck purses. Now, when we hear mentions of neck purses, we shrug and go, "Duh." This one measures 9" tall x 5-1/2" wide with (3) stacked zipper pockets in front reaching down as deep as the purse and another one on the back. Also has a snap pocket on the front. In classic black, and made of what we would call leatherette but they call lambskin. Know what else it has? Of course you do—a neck strap! Think of it as a larger version of the passport holders people wear around their necks, or the big laminates you get at a conference.

Black Duffel, Orange Stitches

Here's a good-looking 24" x 12" duffel bag that you'll won't have to search hard for on the baggage carousel. Twin carry handles are stitched around the circumference of the bag, which has (2) zippered pockets on the sides and (1) on the end. Main compartment has double zippers. It's a sturdy bag that stands out.

Stink-Fighting Bag

Laundry stinks. It's also a job we dislike. But back to that stench. This white mesh bag, approx 18" x 12", has a way of dispersing the stinkiness of our laundry, which makes the whole job less stinky in more ways than one. Has a drawstring with a ball stopper. Made of polyester, which means it's strong enough to hold a big load of clothing, beach toys, shoes (which can also be stinky in our experience), or sports equipment.

A Roll For Your Drawers

There's nothing worse than opening a drawer and hearing everything shift and slide all over the place. OK, sure, there are a few worse things, but man we hate that sound. This non-adhesive, soft, synthetic, grippy material brings the sliding to a halt. You'll get a roll of it, 12" wide x 144" long, and all you have to do is cut it to fit. Without glue of any kind, it naturally sticks to the bottom of your drawer. It's white-cream colored and sort of lacey, probably for extra grip. Great for kitchens, bedrooms, RVs, tool chests, garages, workshops, hobby rooms, man caves and she sheds.

Scary Molds

These white porcelain molds from the balloon industry are, frankly, the scariest non-medical items we've seen in a long time. They come in all sorts of sizes, in a bunch of shapes and sizes: rounds, ovals, screws, rods... on shafts with a threaded end to screw into a balloon machine. A surrealist's dream, the answer to an avant-garde sculptor's prayers, and great items to leave in your medicine cabinet for nosy guests to find. We'll make sure you get at least 3 different ones, but sorry, no requests.

Siiiiix, Gold-ish, Riingings!

You can't blame the original manufacturer for putting (6) gold rings in a package instead of just (5). If they'd have put (5) in there, they'd get nothing but jokes about the "Twelve Days of Christmas" song, which would be annoying. Rings are made of steel with a gold-ish coating, 1/8" thick x 9" dia, which means they're way too small for a lord to leap through but ideal for macrame, dreamcatchers, ring around the pin and more. Not suitable for French hens.

50480 9" Goldish Rings **\$4.50/pkg(6)**

Buckskin Laces?

More likely cowskin, but who ever says that? Leather, anyway. Our each is a package of (10) leather cords, 3/16" x 1/16" x approx 48"-70" long, ready for your frontier craft needs, or for lacing up your boots. Also dandy for cowboy key chains.

We think of these as industrial worry beads, but they're really 5/16" dia (8mm) steel ball bearings, ready to be put to whatever ball-bearing uses you might have. (If you're lucky maybe even one long piece) Think coin purses and bracelets, not belts. Maybe a jacket for a hipster rabbit. Colors are all over the place, from light and dark browns to reds, whites, maroons and more. You get approx (2) pounds total. **Jarvis Says:** Our Pkg (2) is one bag weighing Approx. 2 LBS.

Put Cork On It

Or under it, or somewhere. These 1/4" thick cork rubber sheets are approx 22" x 16", and they're surplus from a gasket manufacturer. They make great vibration dampers, and can be cut to fit for furniture and floor protection. Also good to deaden sound in the storage of tools, and pots and pans. Various black streaks through the brown cork may militate against bulletin-board use, but then again maybe not since the bulletins will cover that anyway. And, yes, they're perfect if your hobby just happens to be gasket-making.

The Fairest Of Them All

We'd say our price for this flexible mirror material is about as fair as you can get. For less than 8 bucks, we'll send you (9) 8" x 9-3/4" sheets of a reflective material we believe to mylar with a self-adhesive back. The idea is to make a mirror-like surface anywhere. We say mirror-like because this stuff has a little carnival feel to it. In other words, it's not totally clear. But it is fair, and when you need a reflective material, it's beyond fair—it's great.

Paul went out to the warehouse and almost picked up a pallet jack with this monster 2" square 100-lb pull retrieving magnet from Magnet Source®. Painted red it stands 2-3/4" high with a 1" dia (5/8" ID) eyebolt screwed and bolted into the top, and has welded steel construction to protect and focus the ceramic magnets inside. Includes (2) magnetic shields that you remove before use. Attach a rope or chain to the eyebolt to retrieve or hang heavy items, or use to hold/position hoses or wiring temporarily. Also good for plucking stuff out of rivers and other waterways when the fish aren't biting.

Cut Your Stress In Half

This might be our most convenient stress-relief tool, a 2-3/4" dia x 1-1/2" tall foam half-ball in green with a simple ceramic magnet on the flat side. Stick it to the fridge, where it'll hold your grocery list, a photo or a few papers, and you'll always know where it is when it comes time to squeeze the bejesus out of it to blow off some steam. If you really give it the business, the magnet might pop out, but it's easy to re-glue. You'll get (6) squeezers, so you can give some to your equally frazzled friends.

Stick To It

Like your cousin the state senator, this N42 neodymium magnet has a lot of pull—an estimated 90 lbs on flat steel surfaces. Ideal for holding, hanging and retrieving objects. Measures approx 1-1/4" dia x 1/4" thick with an M6 eyebolt that has an approx 3/4" inner and 1" outer dimension and serves as a pulling (or hanging from) handle. Nickel-coated steel cup protects the magnet from damage, and concentrates the force on the magnet's surface.

The magnet is 1-1/4" dia x 1/4" thick and the hole is about 1/8" dia. We estimate 25+lbs pull based on the face our owner made trying to pull it off his file cabinet. Slide hooks or other hardware through for a powerful mount, which, let's be honest, is what we all want!!

97544 1" Neo. Magnet \$9.95/each

Mystery Magnet

Beats us, frankly, but this black plastic cover, 1-3/4" x 1-1/2" x 1/4" (not unlike a tiny toilet seat cover) is hiding a really nice 1" dia x 1/8" (think: quarter size) plated neodymium magnet, with at least a 5-lb pull, inside. The mystery is that the cover won't open unless you break it. The magnet grabs fine in the case or out of it (and frankly, it makes it easier to take off a surface). Or, tap it on its side with a hammer to crack open the case and reveal nothing but magnet. Just Watch your fingers, please.

The Gas Is Coming!

Not everybody has a voice as strong as Paul Revere, so in later wars, U.S. soldiers spun a Gas Attack Rattle, just like this reproduction, to warn of impending gas attacks. Handle measures 8" bottom to top, with about 3" of rattle that extends perpendicular to the handle for 11". It's fairly lightweight, and loud enough to wake up any troops, even yours.

For Walls, Not Skies

Don't use these super-cool FAA aeronautical charts to navigate the skies, because they're expired. Not long ago they were used for training and flight simulators. We have an assortment of random U.S. charts, and we'll send you a great one. They measure approx 58" x 20" but will vary depending on the area of the country they depict. Each is double-sided, color-coded and folded. We repeat: The charts are expired! Not to be used for actual aviation! Know what they're great for, though? Replacing your old Hendrix posters and beer signs, and telling the world you're a sophisticated adult with refined tastes. Since aviation charts expire every 56 days, like the yogurt in our fridge, we're going to keep getting new ones. So keep ordering. Peltier Heat Pump

High tech comes to Am Sci & Surp!! It is here in the form of a Peltier junction, a thermo-electric device that translates electric power into heat, and perversely, into cool. Apply current at 15VDC to the gizmos and they extract thermal energy from one face, thereby cooling it. The heat is dumped onto the other face, thereby heating it. Please note: you must use a heat sink on the hot side or the junction will fry itself, since it can quickly create a 65° C temperature differential in a no load situation. 1-9/16" sq. x 3/16" thick and draws 6A.

Pistons Are A-Pumpin'

It's a beauty folks. These are pretty clean take-outs from what we have been told is a breast pump assembly. They operate from 3VDC up to 12VDC, but that won't matter because we are going to include the wall adapter. (9VDC@2Amps) The steel housing measures 3.5" x 4" x 5" and inside is a gear motor, 2.5" piston style assembly and a control board. The controller has a speed control and a push button pause. The diaphragm on the top of the assembly measures 2-3/4" and raises up and down about 1". It's a very soothing sound. Built in Switzerland so you know it's a sound unit.

Lazy Scott Bearings

Never seemed fair to nail the "lazy" tag so permanently on the "Susans" but that probably has no "bearing" on the issue. We had these in surplus once and they were quite popular. To our chagrin, we discovered they could be bought commercially for the same price. So we did. Has a sort of fiber/mesh design and it's tackier than a Reno wedding chapel gift shop.
